Eduvos Assessment Coversheet

Academic Details

Campus: **MIDRAND CAMPUS**

Faculty: **INFORMATION AND TECHNOLOGY**

Module Code: **ITMDA3-34**

Lecturer's Name: **SIYANDA MBATHA**

Group (if applicable): **GROUP 9**

Assessment Details

Assessment Type: **DELIVERABLE 4**

Assignment/Brief Number: **4**

Due Date / Submission Date:

Student Details (Group, if applicable)

#	Full Name	Student Number	Contact Number	% Participation	Signature
1	ANOTIDA DZINOTYIWEI	EDUV4932003			
2	NSUKU MASWANGANYI	EDUV4821574			
3	LONDIWE MAHLANGU	36G7W75P7			
4	SURELY MODUPI	EDUV4918966			

Academic Integrity

AI Disclosure Completed: Yes [ ] No [ ]

Declaration:

I declare that this assessment is my own original work except for source material explicitly acknowledged. I confirm that this work has not previously been submitted for assessment in any course. I acknowledge the institutional AI policy and confirm that AI tools have only been used as stipulated and disclosed.

AI assistance disclosure - submission preparation: AI tools assisted with formatting this PDF, organising the submission files, preparing the source archive and operating the Android emulator to capture the demonstration. This disclosure describes preparation of the submission package; the group should record the full extent of project development assistance in its institutional disclosure.

AI-Powered Student Financial Document Management Platform

Deliverable 4: Application Implementation and Demonstration

Folio - Student Financial Document Workspace

1. Submission Links

Dedicated GitHub repository
https://github.com/ano4l/Folio-Deliverable-4

Native Android demonstration
https://github.com/ano4l/Folio-Deliverable-4/blob/main/Folio-Demonstration.mp4

Slower Android user-story recording
https://github.com/ano4l/Folio-Deliverable-4/blob/main/Folio-Android-Story.mp4

Web application recording
https://github.com/ano4l/Folio-Deliverable-4/blob/main/Folio-Web-Application.mp4

Admin recording - fictional data
https://github.com/ano4l/Folio-Deliverable-4/blob/main/Folio-Admin-Demo.mp4

Complete source code ZIP
https://github.com/ano4l/Folio-Deliverable-4/blob/main/Folio-Source-Code.zip

The repository contains the source archive, four silent MP4 recordings, this PDF, individual screenshots and the user manual. The additional web and admin recordings use fictional local demo data; the admin page exposes account metadata only and contains no documents.

2. Implementation and Evidence

Folio combines a document vault, page-aware reading and search, source-linked AI questions and answers, practice quizzes, study notes, revision cards and deadline planning. The source ZIP includes the web/API application, Flutter app, local mobile plugins and database migrations.

Evidence scope: The original native walkthrough and its screenshots were captured on 20 October 2026 using an isolated account and synthetic lecture and fee documents. The slower Android user story was recorded on 21 October with a local mock API and fictional lecture source. Its AI answer and quiz are simulated. The web and admin recordings and the two new admin screenshots also use fictional local fixtures; no production records or documents appear in them.

The recordings are silent for later editing and voiceover. Study notes and revision data are stored locally in the app. Email delivery, sign-in/MFA delivery, physical-device behavior and camera scanning are outside their scope. The earlier native recording continues to show the configured running API; its AI outputs should be checked against the original source.

3. Native Android Visual Evidence

3.1 Document workspace

The native dashboard shows the demonstration account and its documents. The vault presents the synthetic lecture notes and registration statement.

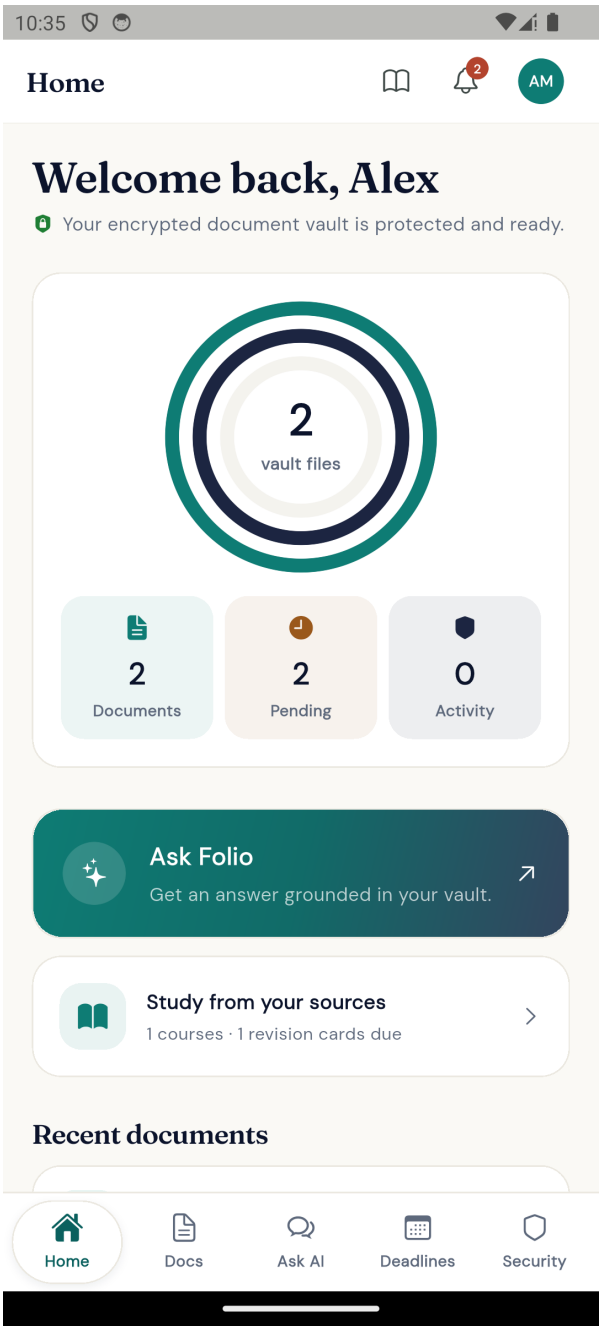

Figure 1. Home dashboard

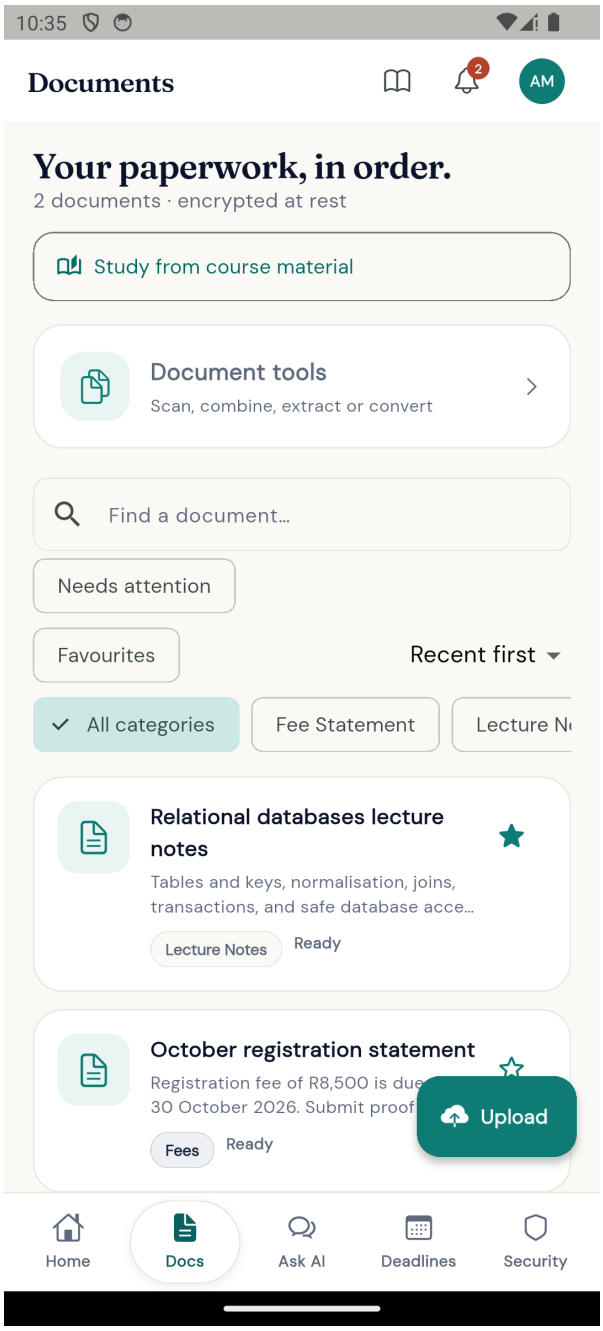

Figure 2. Document vault

3.2 Document details and source reading

Document details provide a summary and extracted information. The source reader retains page numbers for checking information against the lecture.

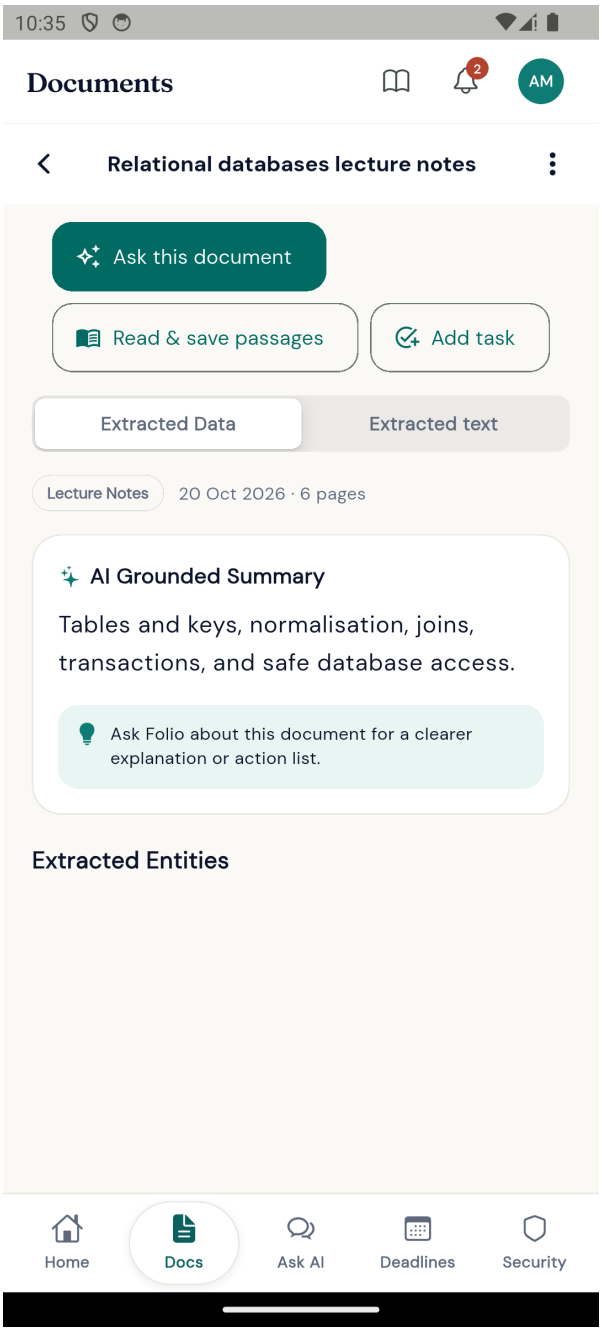

Figure 3. Document details

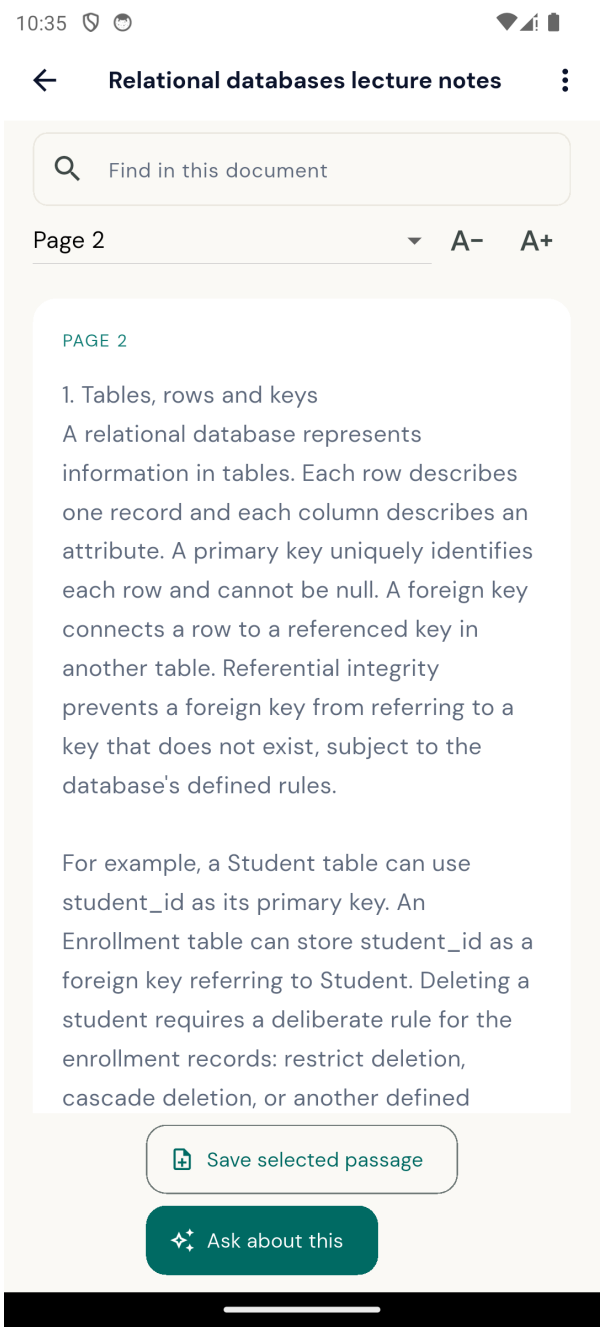

Figure 4. Page-aware source reader

Native Flutter app | Android emulator | 20 October 2026

3.3 Course organisation

The Database systems course groups the lecture source in a dedicated study space.

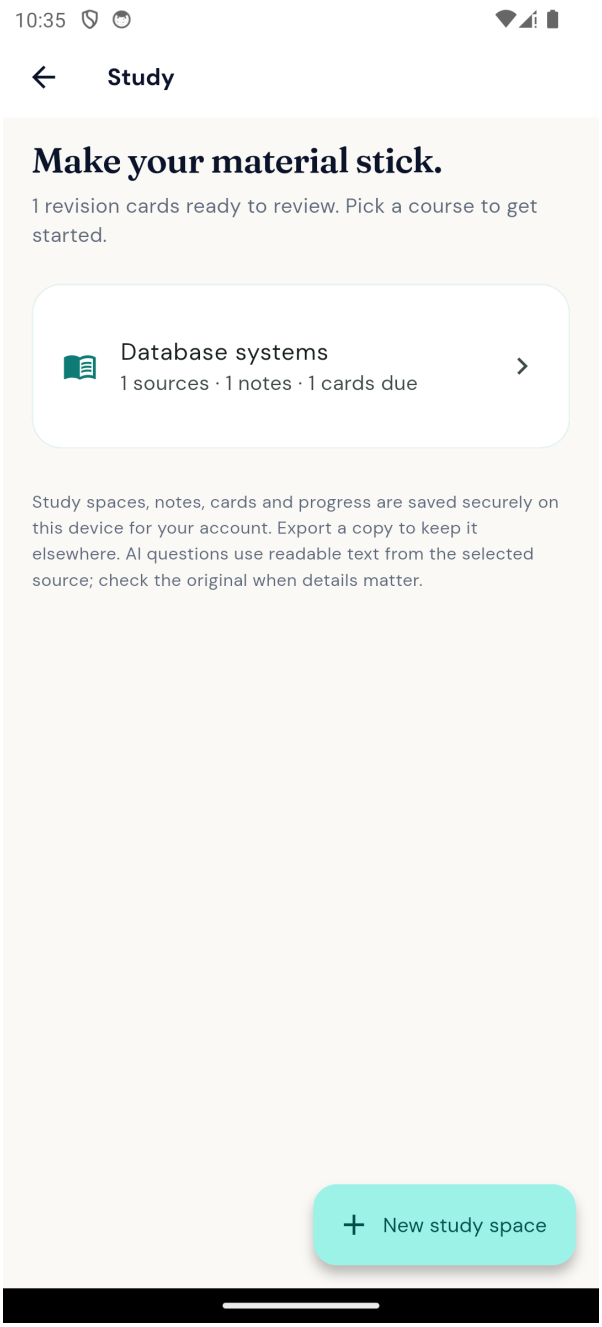

Figure 5. Study spaces

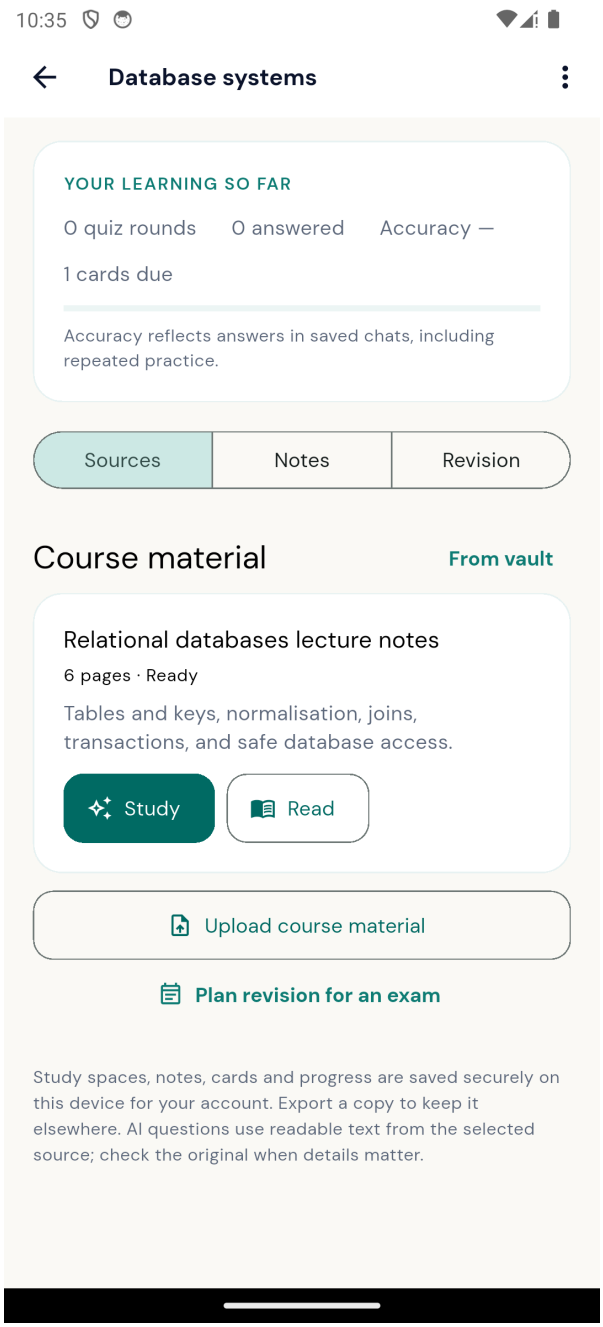

Figure 6. Course sources

Native Flutter app | Android emulator | 20 October 2026

3.4 Study notes and revision

The tour uses a prepared note on keys and a source-linked revision card. These learning materials are saved in the local device workspace.

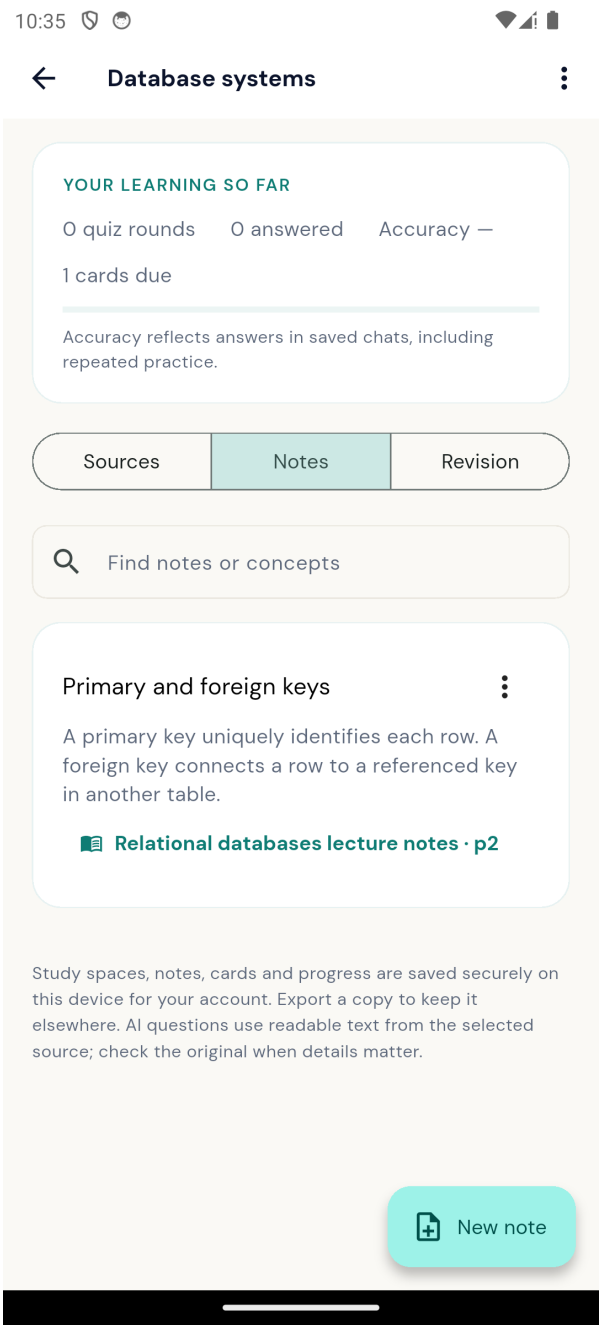

Figure 7. Saved study note

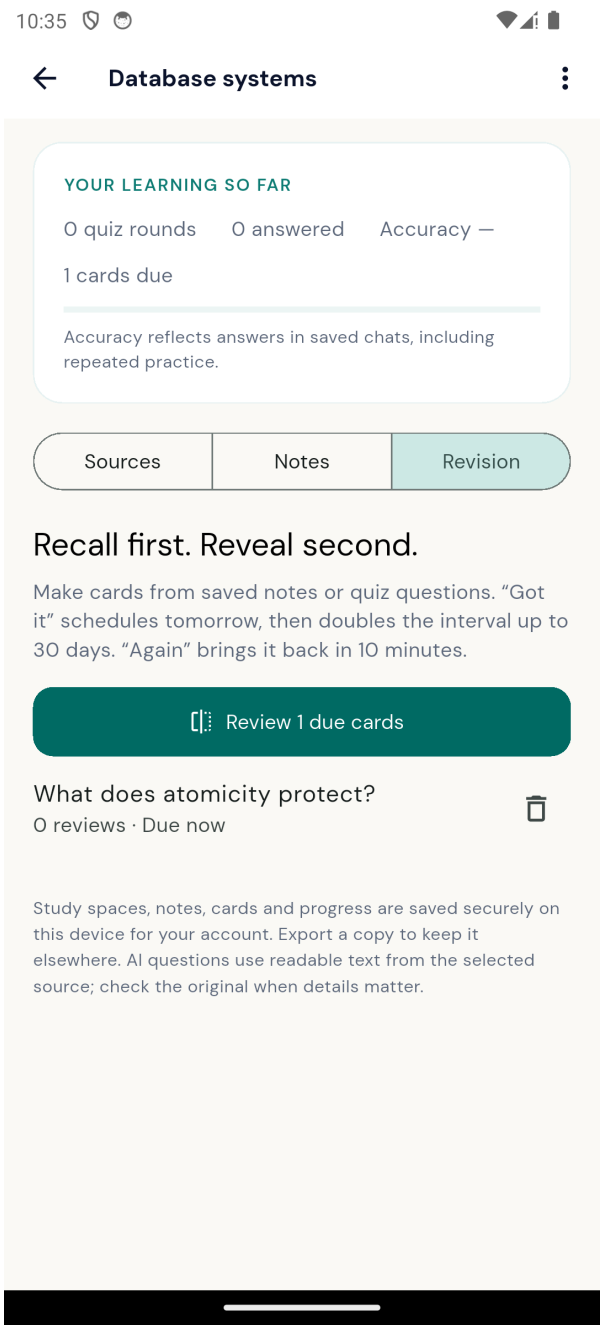

Figure 8. Revision deck

3.5 AI assistance and quiz setup

A question about primary keys is sent through the native app to the running API. The quiz dialog lets the user choose a short practice round.

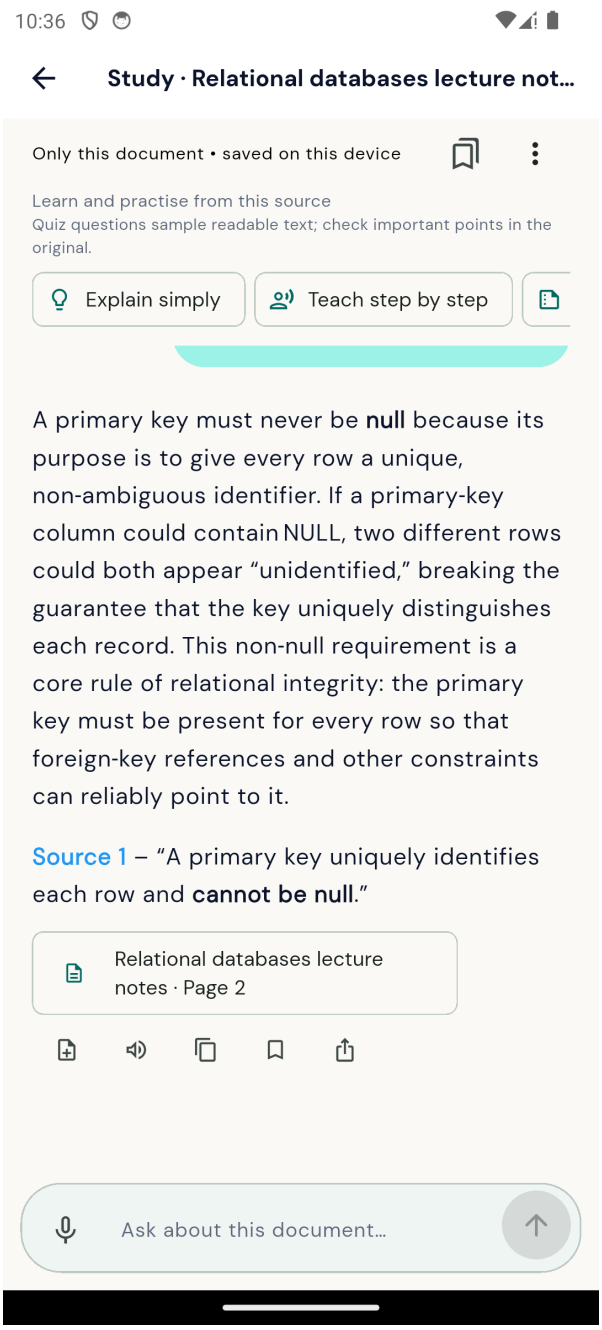

Figure 9. Generated AI answer

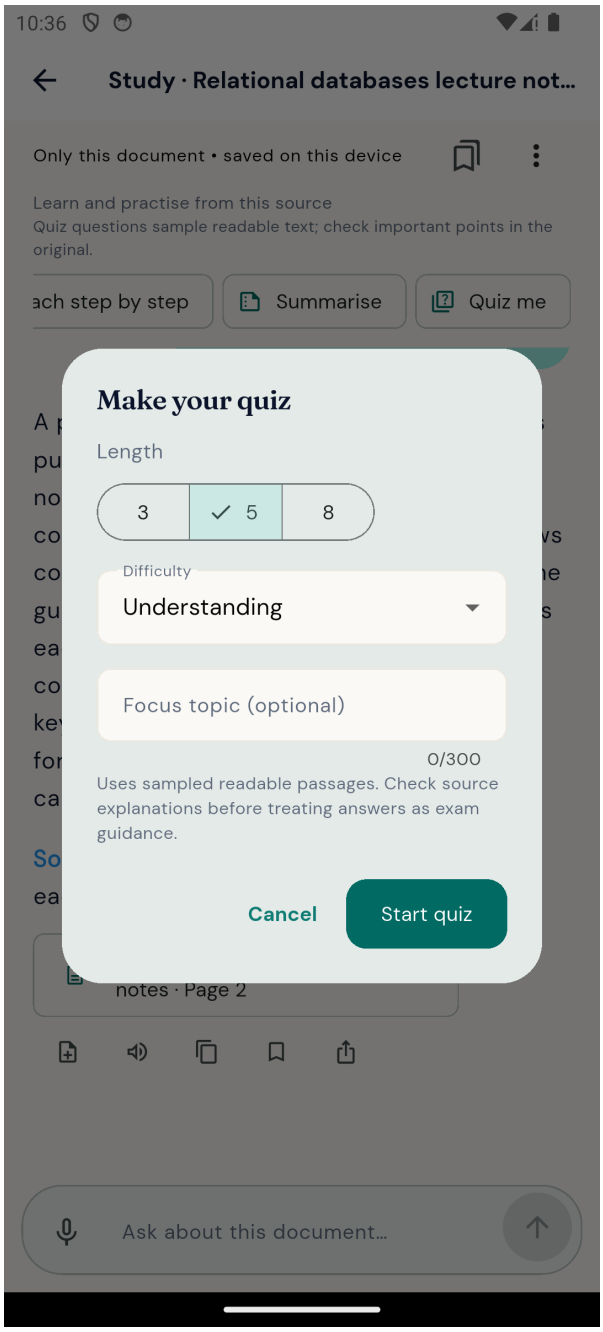

Figure 10. Quiz configuration

Native Flutter app | Android emulator | 20 October 2026

3.6 Quiz interaction and results

Three questions are generated from the lecture. Options are selected through the native interface. The completed round shows the score, an explanation and a source-page reference.

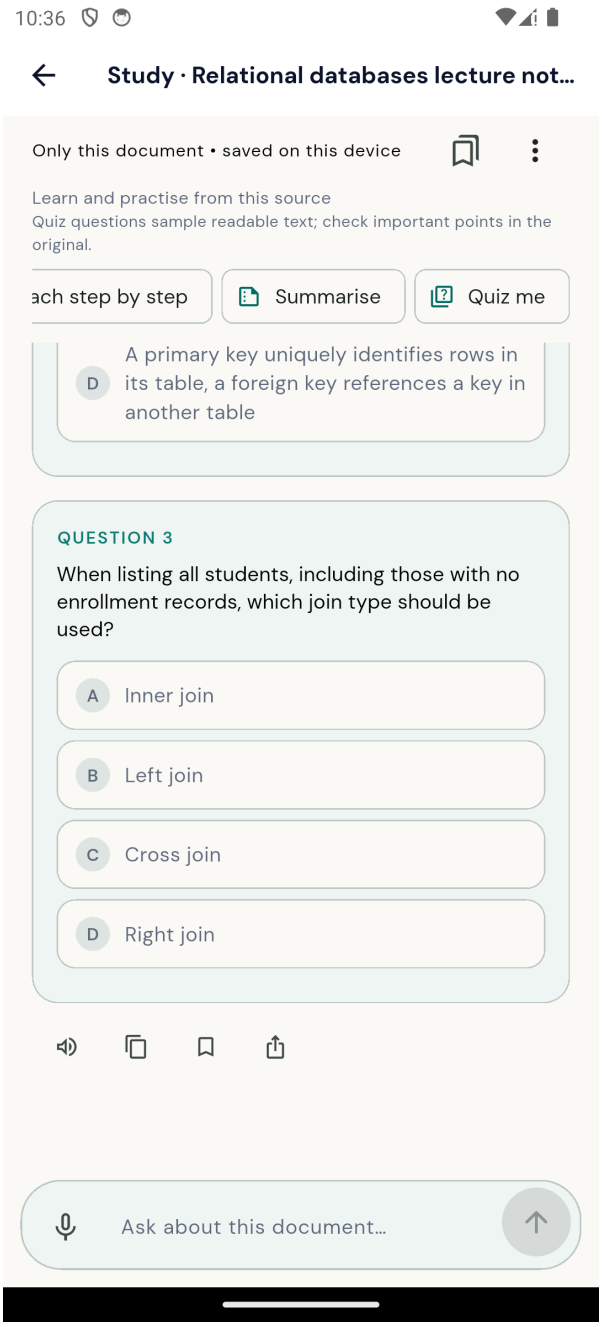

Figure 11. Generated practice quiz

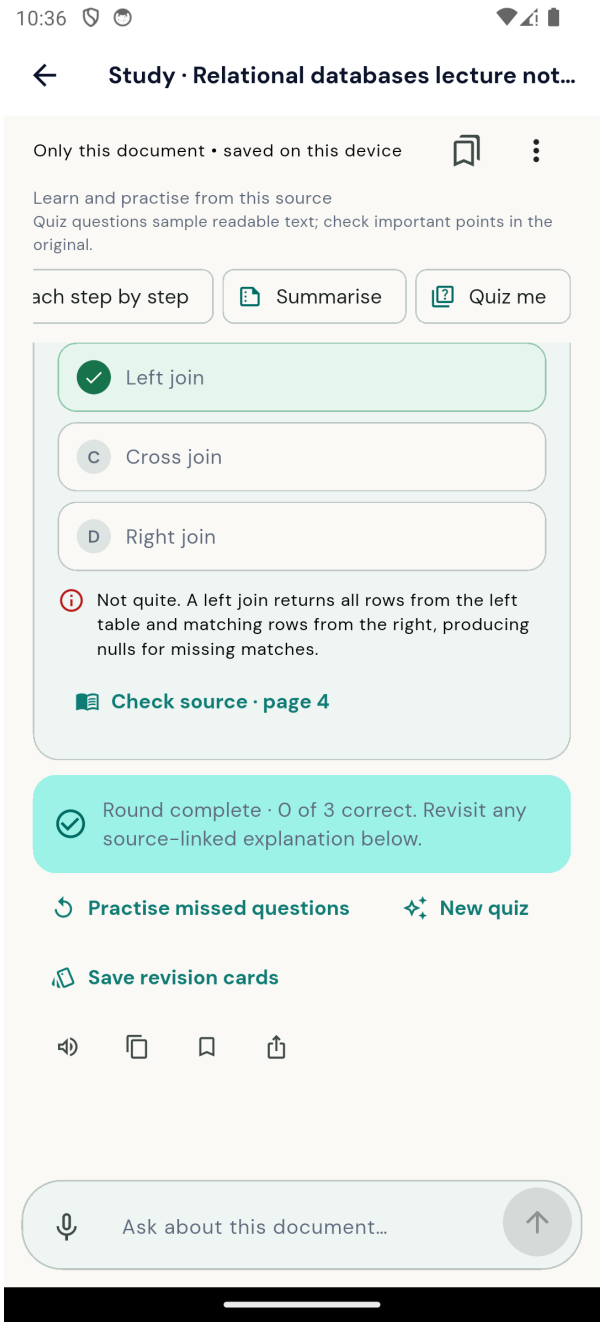

Figure 12. Feedback and completed round

3.7 Document-linked deadlines

The task list and monthly calendar present dates drawn from the synthetic registration statement. Users should verify extracted dates against the original document.

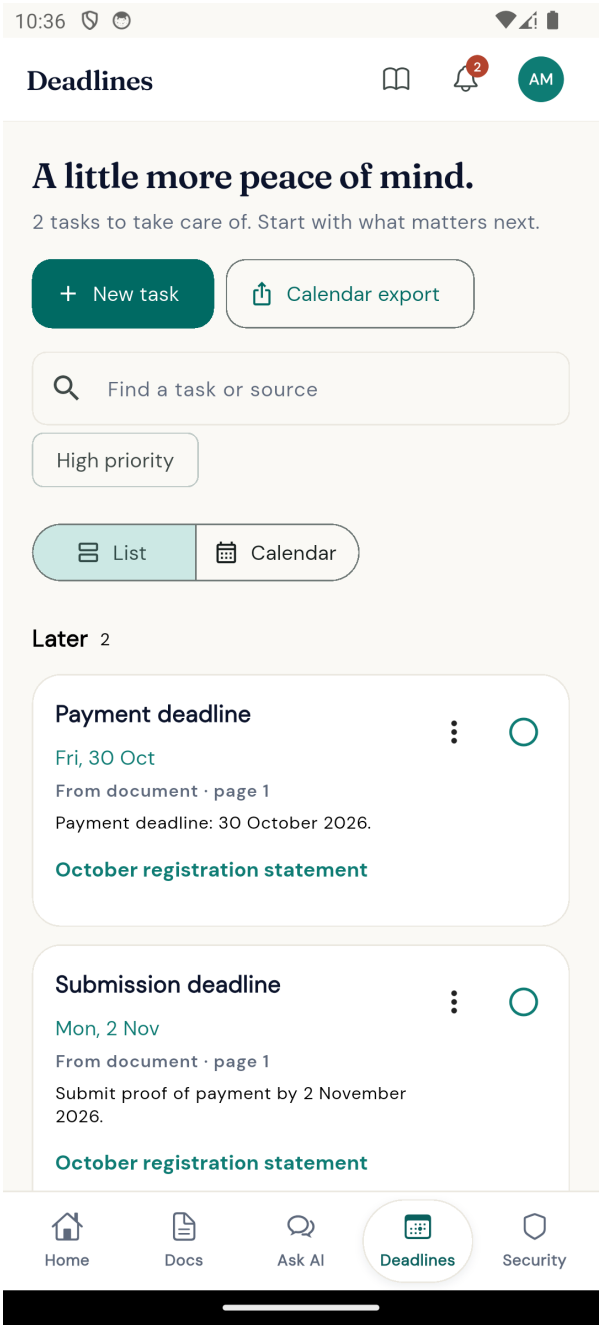

Figure 13. Document-linked tasks

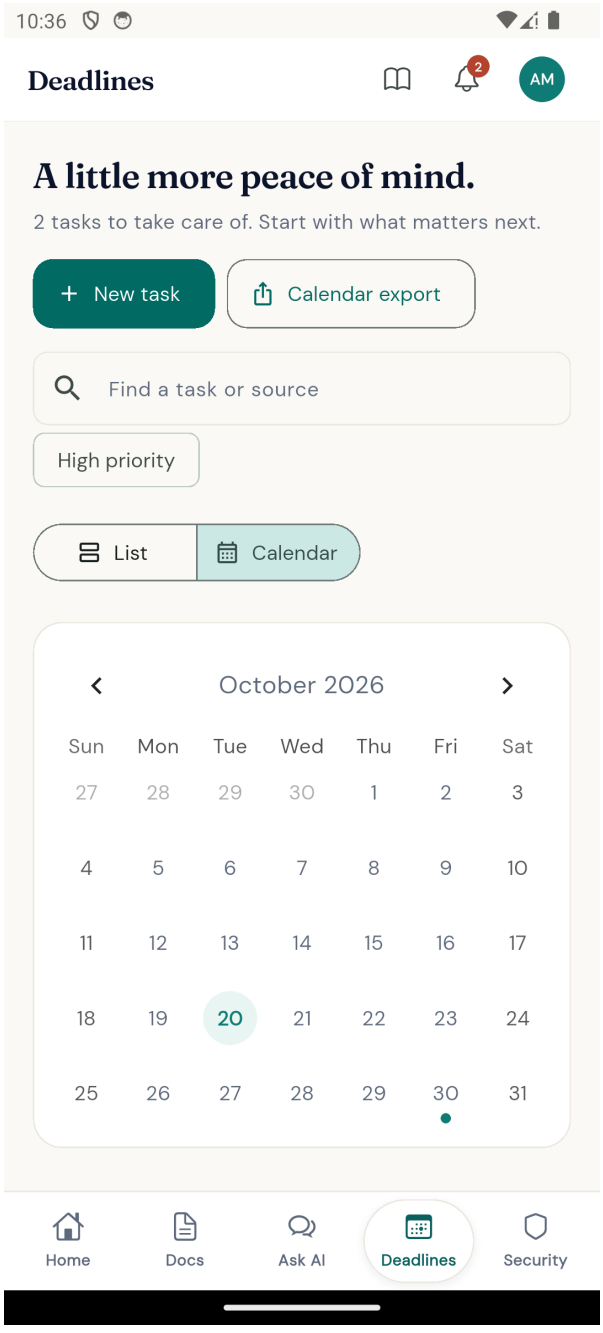

Figure 14. Deadline calendar

Native Flutter app | Android emulator | 20 October 2026

3.8 Task editing and account controls

The task editor links a date to a source document. The account screen shows native security controls and local activity; operating-system reminder delivery and biometric enrolment are outside the scope of this capture.

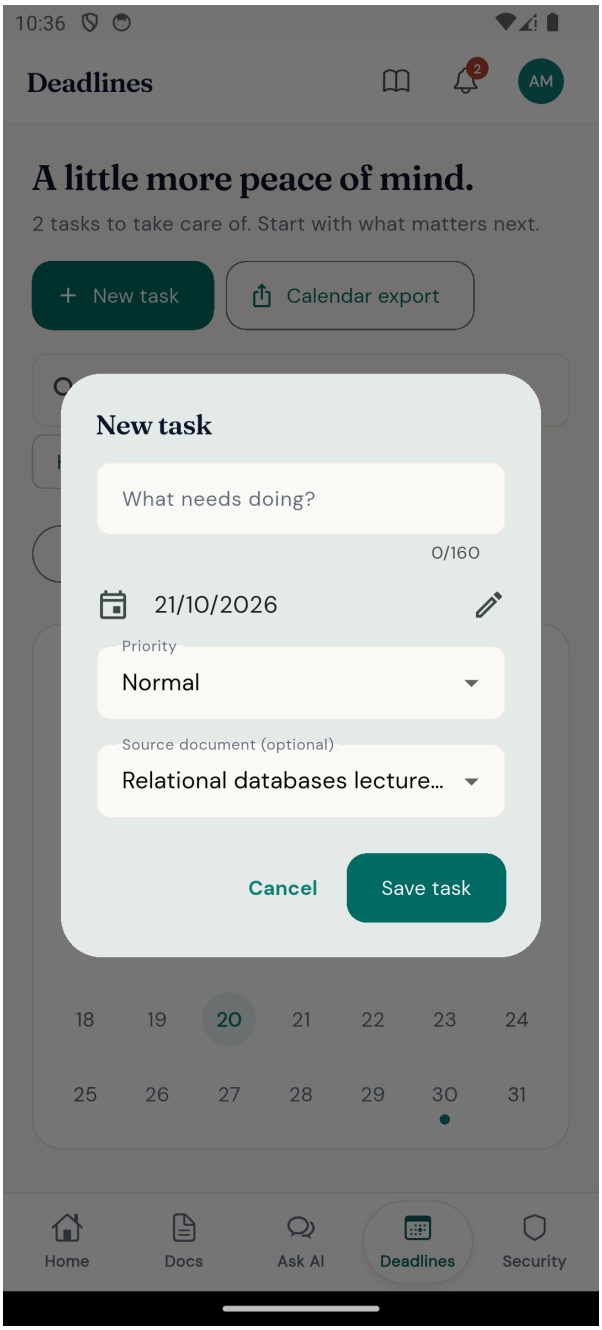

Figure 15. Task editor

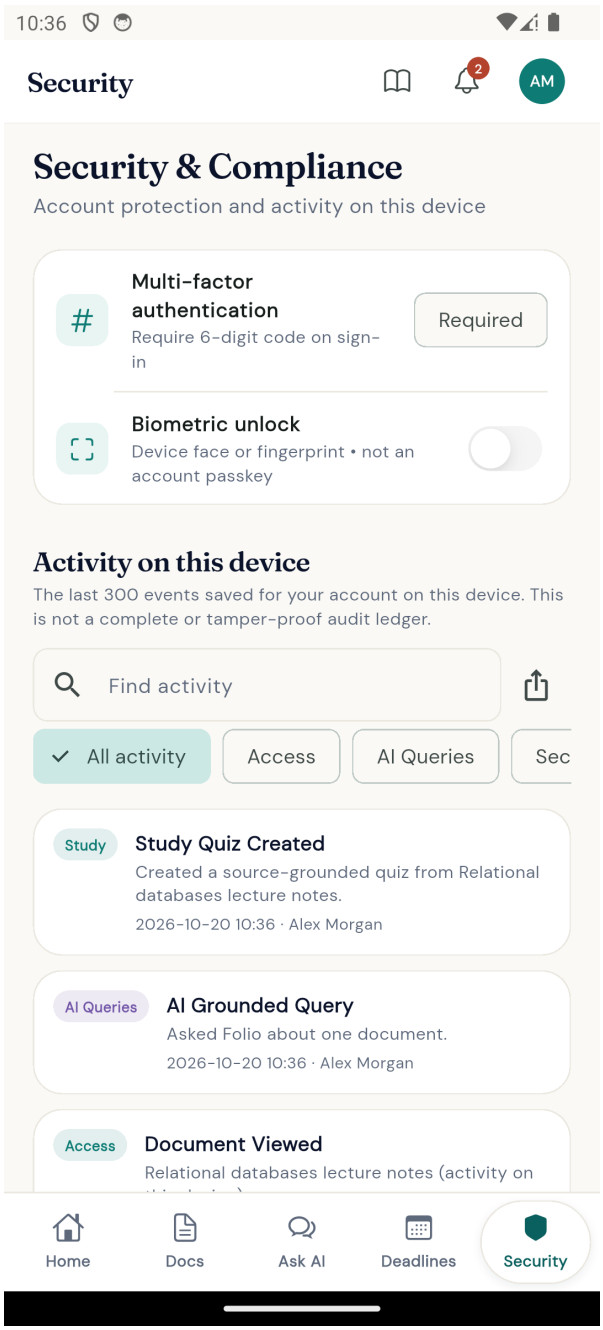

Figure 16. Security and activity

4. Administration Visual Evidence

4.1 Desktop administration page

Fictional local sample accounts and aggregate session/AI counters. The table includes account metadata only; private documents, prompts and answers are not exposed.

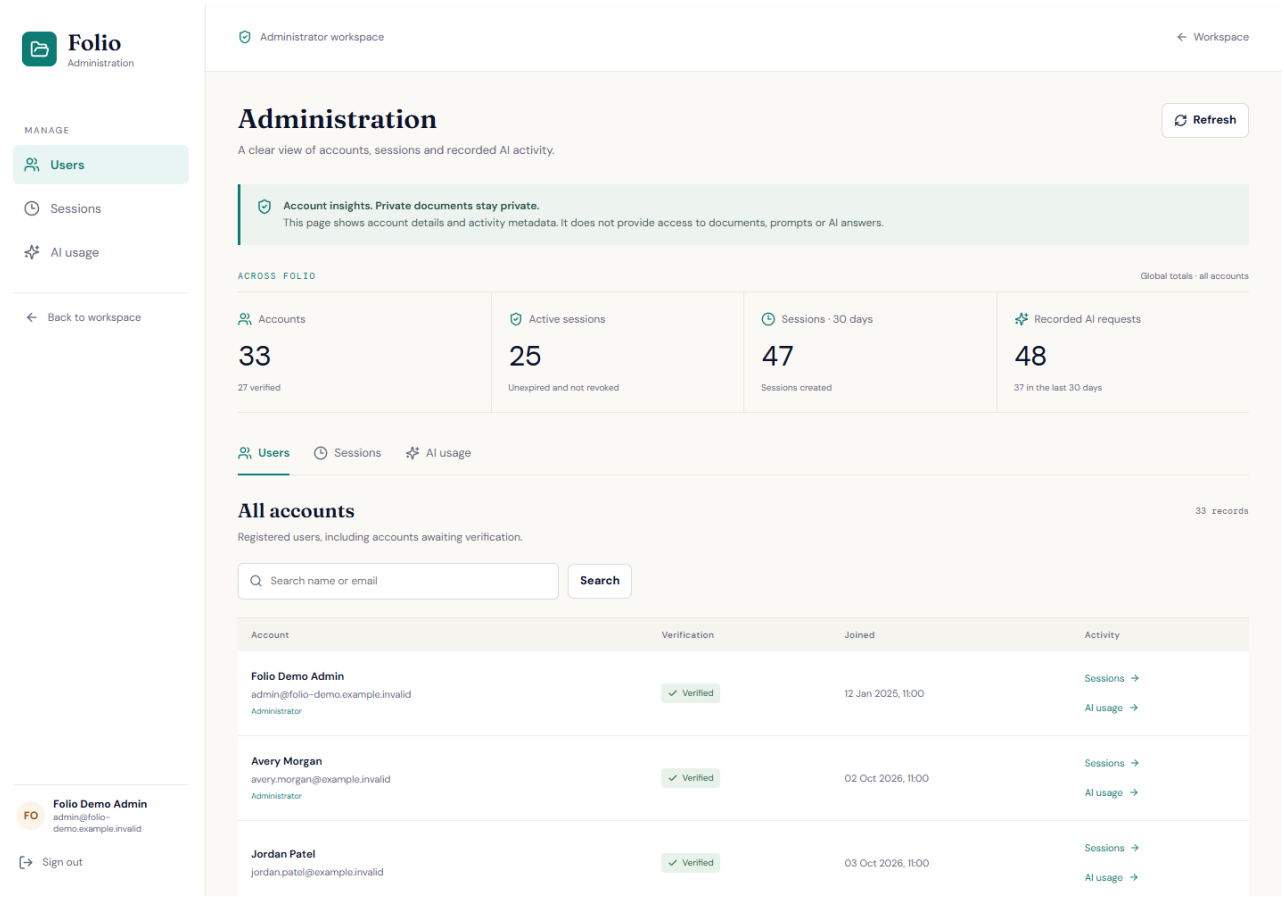

Figure 17. Desktop administration view

4.2 Phone administration page

The same fictional, document-free account view at a phone screen size.

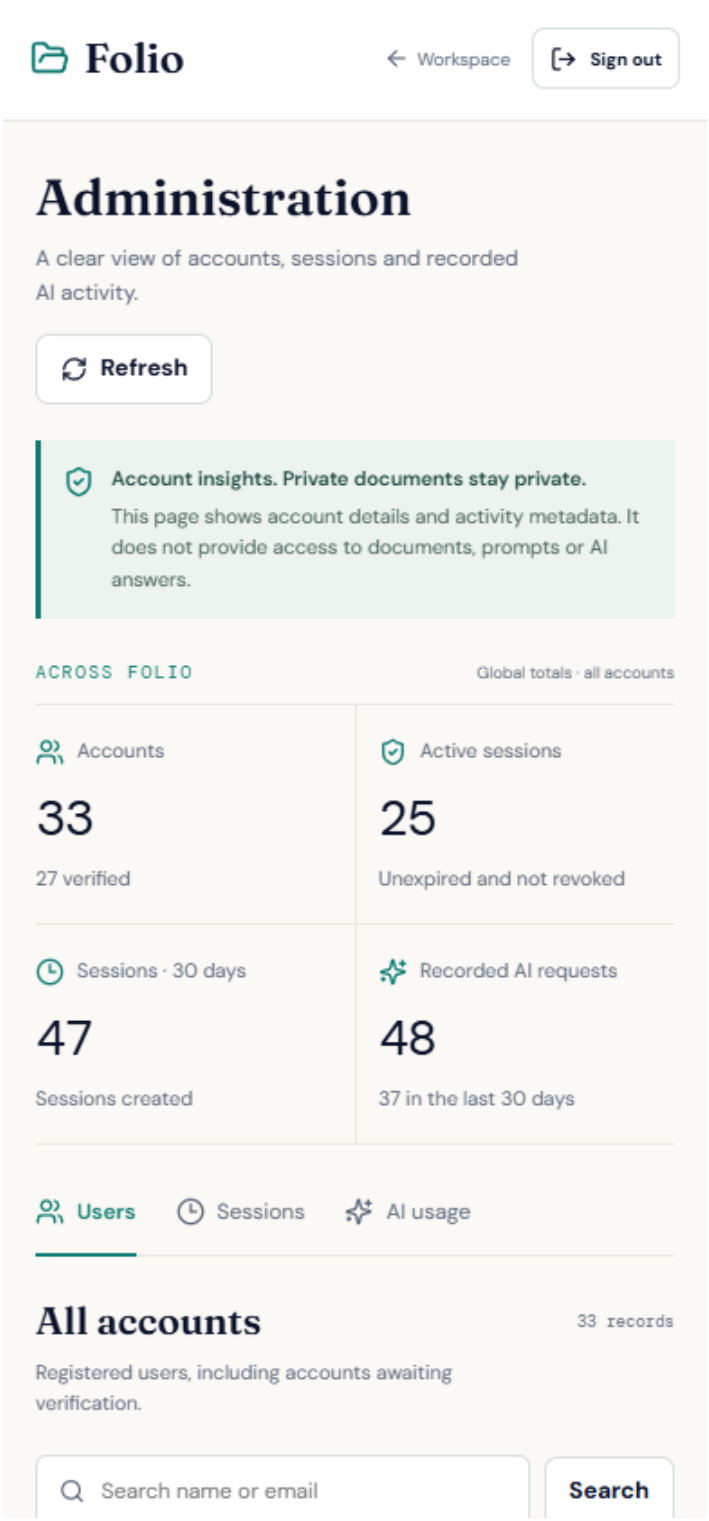

Figure 18. Phone administration view
